User Role & Access Manual

A guide to who can see and do what inside your CampusNexus workspace — for Administrators, Management, Department Heads, Faculty, Support Staff, and Students.

Welcome to CampusNexus

CampusNexus is a single system shared by everyone in your institution — but nobody sees everything. Each person only sees the parts of the system relevant to their job: a student sees their own attendance and fees, a faculty member sees their classes and leave balance, and an administrator sees the full picture across the college. This manual explains exactly what each role can see and do, and why.

Every default in this manual can be customized. The access levels described here are our recommended starting point for a typical academic institution. Your Administrator or Management account can fine-tune exactly which modules any role — or any individual staff member — can access, from **Controls & Settings** → **Module Permissions**. Nothing here is fixed in stone.

Logging In

Everyone logs in from the same page — your institution's base CampusNexus URL — regardless of role. There is no separate login page per department or per college subdomain; the system automatically recognizes your account and takes you to your own workspace after you sign in.

ROLE	USERNAME	EMAIL	PASSWORD	INSTITUTION CODE
Administrator	demo_admin	admin@demo.edu	Password123	demo
Management	demo_mgmt	mgmt@demo.localhost	Password123	demo
Department Head (HOD)	demo_hod	hod@demo.localhost	Password123	demo
Faculty	demo_faculty	faculty@demo.localhost	Password123	demo
Support Staff (Librarian)	demo_support	support@demo.localhost	Password123	demo
Student	demo_student	student@demo.localhost	Password123	demo

These are demo credentials for evaluation only. Please change passwords immediately for any real staff or student account, and never reuse these demo credentials in a live institution.

The CampusNexus sign-in screen — the same page for every role.

Management

Who this is for: the Principal, Director, Trustee, or institution owner — the person ultimately accountable for the whole college. Management holds the same access as Administrator by design: two trusted top-level seats rather than one, so day-to-day operations don't stall if either person is unavailable.

CAN ACCESS

- Full user directories — Management, Administrator, Staff, Student
- Department & Room setup
- Attendance, Schedule, Leave, Payroll
- Exams & Assignments oversight
- Fees collection, Bus Tracking, Hostel, TPO, Library, Inventory, Valuation
- Announcements (institution-wide)
- Analytics, incl. monthly payroll spend
- Audit Logs (full activity trail)
- **Module Permissions** — customize any role's access

NOT APPLICABLE

- Nothing is withheld — Management is a full-trust seat

Management dashboard — institution-wide headcount, trends, and category breakdown.

Administrator

Who this is for: the Registrar, Office Superintendent, or Operations Head who runs the college's daily administrative machinery — admissions records, staff HR, fee collection, compliance. Functionally identical access to Management, since this role carries out the operational decisions Management makes.

CAN ACCESS

- Full user directories — Management, Administrator, Staff, Student
- Department & Room setup
- Attendance, Schedule, Leave, Payroll
- Exams & Assignments oversight
- Fees collection, Bus Tracking, Hostel, TPO, Library, Inventory, Valuation
- Announcements (institution-wide)
- Analytics, incl. monthly payroll spend
- Audit Logs (full activity trail)
- **Module Permissions** — customize any role's access

NOT APPLICABLE

- Nothing is withheld — Administrator is a full-trust seat

Administrator dashboard — same institution-wide view as Management.

Department Head (HOD)

Who this is for: the academic head of a single department — responsible for their department's staff, students, timetable, exam coordination, and leave approvals. An HOD runs their department, not the college's finances or other departments.

CAN ACCESS

- Staff & Student directories (their department)
- Department profile & Room booking
- Attendance & Schedule oversight
- Leave — review and approve department staff requests
- Exams, Assignments, Valuation (paper correction) coordination
- TPO — placement coordination for their students
- Library (reference access)
- Analytics — department performance & attendance trends
- Announcements

CANNOT ACCESS

- Payroll & salary data — HR/Admin territory
- Fee collection & billing — Accounts/Admin territory
- Audit Logs — security/compliance, admin-only
- Hostel & Inventory — non-teaching operations
- Bus Tracking — not core to academic department duties
- Module Permissions — cannot change other roles' access
- Other departments' staff/student directories

Department Head sidebar — scoped to academic and departmental operations only.

Faculty

Who this is for: teaching staff — professors, lecturers, class instructors. Faculty access is built around a single question: "what do I need to teach my classes and manage my own employment record?" Nothing about the rest of the institution's staff, finances, or students outside their classes.

CAN ACCESS

- Attendance — mark attendance for their own classes
- Schedule — their own teaching timetable
- Leave — apply for and track their own leave
- Exams — view schedules, participate in coordination
- Assignments — create and grade for their classes
- Valuation — exam paper correction duty
- Analytics — their own class/attendance performance, plus **pending leave requests** instead of payroll figures
- Announcements — post to and read from their classes

CANNOT ACCESS

- Payroll & institution-wide payroll totals
- Fee collection & billing
- Audit Logs, Module Permissions
- Staff/Student directories beyond their own classes
- Hostel, Inventory, Library management
- Bus Tracking — not part of teaching duties

Faculty dashboard — a personal snapshot, not an institution-wide report.

Faculty Analytics view — "Pending Leave Requests" replaces the Monthly Payroll figure Management/Administrator see.

Support Staff (e.g. Librarian, Warden, Store-keeper)

Who this is for: non-teaching operational staff. "Support Staff" is a shared starting template covering several job types — librarian, hostel warden, store-keeper, front-office — so it deliberately includes all the operational modules a non-teaching employee might need. In this demo the account is a Librarian.

CAN ACCESS

- Room — facility/room bookings
- Leave — apply for and track their own leave
- Hostel — allocations and room management
- Library — catalog, issue/return books
- Inventory — stock and supplies management
- Announcements

CANNOT ACCESS

- Academic modules — Exams, Assignments, class Attendance
- Payroll, Fees, Audit Logs
- Staff/Student directories
- Analytics, Module Permissions

Narrowing this further: because "Support Staff" bundles multiple job types by default, we recommend Administrators use **Module Permissions** to create focused roles for larger teams — e.g. a "Librarian" role with only Library access, and a separate "Warden" role with only Hostel access — once you have more than a couple of non-teaching staff.

Support Staff (Librarian) sidebar — operational modules only, no academic or financial data.

Student

Who this is for: every enrolled student. This is a strictly self-service account — a student can see and manage only their own academic and personal records, never anyone else's, and never institution-wide staff or financial data.

CAN ACCESS (OWN RECORDS ONLY)

- Attendance — their own attendance history
- Schedule — their own class timetable
- Exams — their own exam schedule and results
- Assignments — view and submit
- Fees — view dues and pay online
- Bus Tracking — track and board their subscribed route
- Hostel — their own room allocation status
- TPO — apply to placement drives
- Library — browse catalog, view issued books
- Announcements relevant to them
- Settings — their own profile

CANNOT ACCESS

- Any other student's or staff member's data
- Staff/Student directories, Department, Room admin
- Payroll, Leave management, Audit Logs
- Analytics, Module Permissions, Inventory

Student dashboard — a personal snapshot only: announcements, exams, and assignments relevant to them.

Customizing Access

The role definitions in this manual are sensible academic-institution defaults, not permanent rules. Any Management or Administrator account can adjust them at **Controls & Settings → Module Permissions**:

What you can do there

- Toggle individual modules on or off for any existing role (e.g. give a specific HOD access to Bus Tracking if your institution wants that)
- Create entirely new custom roles beyond the six described here (e.g. "Accountant", "Warden", "Front Office")
- Control which premium modules (Fees, Payroll, Bus Tracking, Hostel, Library, Inventory, Valuation, and others) are subscribed for your institution at all — a module must be subscribed before it can be granted to any role

Management and Administrator access cannot be narrowed by a delegated custom role — only an existing Management or Administrator account (or the platform's SaaS Admin) can change what those two top-level seats can see. This prevents a delegated permission-manager from accidentally locking out the college's own owners.

Every user only ever sees the *overlap* between what their role is allowed and what your institution has subscribed to — so disabling a module for the whole institution hides it for everyone at once, regardless of individual role settings.
